KUBOTA 4WD DIESEL UTILITY VEHICLE

RTVX900

Get ready for a whole new RTV experience.

Kubota RTV900 have been the best-selling diesel utility vehicles in Europe since 2006. And no wonder. Each year, they set the standard for ruggedness and reliability, proving themselves ready to work day after day under all kinds of conditions.

Well, the best just got a whole lot better. Meet the all-new Kubota RTV X900, still rough-and-ready RTV with more comfort, convenience, and performance.

It's a whole new driving experience, too with a smoother ride, better drivability, more legroom, and improved ergonomics throughout.

Ready for an RTV experience you won't soon forget? Visit your Kubota dealer today and experience for yourself the all-new RTV X900.

KUBOTA 4WD DIESEL UTILITY VEHICLE

RTV X900

TOGETHER

**Kubota diesel engine—dependable power,
when and where you need it.**

Power when and where you need it

Even when the trail disappears, you can rely on the RTV X900 powerful diesel engine to keep you moving forward. Kubota-built and trail-proven, this 3-cylinder liquid-cooled diesel engine has a well-earned reputation for dependable performance even in the harshest terrains. The RTV-X900 comes with a robust 21.6 HP engine.

VHT-X (Variable Hydraulic Transmission)

Kubota has more experience in variable hydraulic transmissions than any other Utility Vehicle manufacturer. Kubota's advanced VHT-X offers a wide torque band and large oil coolers that boost performance and durability.

Two-speed In-line Shift

You'll shift less often and maintain better control, thanks to new transmission gearing with just two forward speeds (high and low), plus neutral, and reverse.

Strong High-rigidity Frame

The high-rigidity steel frame isolates the occupants from noise, vibrations, and harshness. With structural strength that few in the industry can match, this durable frame can take years of punishment from heavy loads and rough terrain.

20% Larger, Clog-resistant Radiator

Open the hood, and you'll find the radiator and air-intake located high and up front, where the air is cleaner and cooler. This improves both radiator performance and simplifies maintenance. Kubota's wide fin pitch design minimizes clogging, further improving radiator performance.

EXCEPTION

ALL-RIDE

Get in and buckle up. You're about to experience a whole new level of driving performance.

Front & Rear Independent Suspension

Regardless of the terrain or load, independent suspension on all four wheels ensures a truly exceptional ride. Kubota's Extra Duty IRS (Independent Rear Suspension) technology also sets a new standard for durability.

Height-adjustable Front and Rear Suspension

Whether you've got a heavy load or no load at all, adjustment of the front and rear suspension height will ensure the proper vehicle height for a smooth ride and optimum driveability.

High Ground Clearance

The new X-series raises the bar on ground clearance—to a full 10.4" with 8" of suspension travel—letting you glide over the bumps rather than through them.

Limited-Slip Front Differential

True 4-wheel drive with a limited-slip front differential and a locking rear differential help reduce wheelspin to a minimum, giving you greater control and a smoother ride on rough or muddy terrain.

Dynamic Braking

You'll feel more secure, especially when traveling down long inclines, knowing that dynamic braking is providing additional braking power and greater driving control.

CV Joint Protectors and Skid Plates

Obstacles on the trail? CV joint protectors and heavy-duty skid plates will protect the most critical parts of the engine and transmission.

A whole new experience in driving comfort.

The experience begins the moment you step into the driver's compartment and settle into the seat. Clearly, the X900 is designed for driving comfort and convenience. More room for your legs, controls that fall naturally under your hands, plenty of utility storage space...from head to toe and side to side, it's a whole new level of easy, practical driveability that must be experienced to appreciate.

60:40 Split-bench Seats

The split-bench style seat is ergonomically designed to provide hours of riding comfort. The driver's side is adjustable fore and aft.

Power Steering

Responsive hydrostatic power steering gives you the control you need to tame any terrain. The steering wheel is tilt-adjustable, allowing you to set the optimum angle for your driving style.

Digital Meter Cluster

Bright, with large, easy-to-read indicators, this digital meter cluster keeps you informed of all critical driving conditions, including speed, hours, and miles traveled. An Overheat Alarm (light and audio) helps prevent engine damage.

Easily accessible Parking Brake

The parking brake is conveniently located on the dashboard for easier access as well as more legroom.

Glove Box

A large glove box on the passenger side provides fast access to critical tools and personal effects.

Under-seat Storage Compartments

Large compartments under the split-bench seats provide plenty of convenient storage space for tools, tie-downs, and personal items.

CAPABILITIES

The capacity for hauling, the strength for towing.

Dumping Cargo Box

With the flick of a single lever, the hydraulic-lift cargo box rises and your cargo slides out. Cargo that could take significant physical strength and time to unload can now be dumped with little effort in mere seconds.

1 Ton Towing Capacity

Standard two-inch hitch receivers at the front and back let you tow up to 1 ton of gear.

Carry up to 15.2 cubic feet of cargo

It's not enough to get you there and back. You need to get your stuff there and back, as well. This heavy-duty steel cargo box can do that for you, carrying up to a half-ton of tools, firewood, gear, supplies...whatever you need to haul from here to there and back again. Cargo tie-down hooks help keep your gear secure.

CABIN CUSTOMIZABILITY

The RTV-X900 provides a modular cabin system. Follow the steps below to customize your vehicle as you like.

Step 1: Windshield with wiper and washer

Need protection from wind and dusts? The windshield for RTV-X900 comes with wiper and washer as standard equipment. The dumper-assisted window opens up almost vertical for your need.

Rops Frame with standard canopy

Step 2: Side Doors

Add side doors to complete your full cabin customization. Fully clear, designed to fit Rops frame doors will give you further protection of climate and debris from outside. The combination of modular cab designed Rops frame and door will give you quiet environment from outside noise. More comfort while proceeding your tasks.

Step 3: Heater and Radio Consoles

Working in cold weather?

Add heater for your optimum operating temperature and facilitate rapid defrosting of window. Console is also Radio-ready with 2 speakers and has auto-motive like interior lights and sun visor.

SPECIFICATIONS

Model			RTV-X900 Orange		
Colour			Orange / Camo		
Engine	Make		KUBOTA D902		
	Type		3-cylinders, 4-cycle, diesel, OHV
